

Schools **ICT**

Manage all your schools iPads and mobile devices from one place.....

.....with Schools ICT's Mobile Device Management Service

The benefit of using a mobile device management solution means that you are in complete control of what resources a student can see and access. Screens can be fully customised to support different learners and display the apps, files and resources you want the student to use and even place them on screen in a position you choose. The settings can be loaded to all devices in one go – no more having to update each individual device or wait for your school technician's visit before new versions are installed.

How can Mobile Device Management help me?

In Supporting Lessons

- Set up from home, at the weekend, in the evening and push this content out to a group of devices knowing they will be ready for the next day.
- Ensure all devices in a class have the resources needed to support lessons. This could be apps, files or access to approved websites.
- Lock down the devices so no additional material can be added or accidentally deleted.
- Fix the position of apps / files on the screen so all students have the same view. This helps when explaining where to find information.
- Send messages to devices eg “5 mins left”

↑ Example of setting up a home screen. This will force the screen to look exactly the same across the chosen devices.

		OS/TYPE	TAGS	LICENSES AVAILABLE	AUTO-INSTALL DEVICES	SELF-INSTALL DEVICES
<input type="checkbox"/>	Remove auto-install tags		Apps-All School Devices	26/85	57/59 Installed	0/0 Installed
<input type="checkbox"/>	Remove self-install tags					
<input type="checkbox"/>	UYH	Apple	Apps-All School Devices	40/100	59/59 Installed	0/0 Installed
<input checked="" type="checkbox"/>	TwinklLTE	Apple	Apps-Band 3 Apps-SEN	85/100	15/15 Installed	0/0 Installed
<input type="checkbox"/>	Transfer	Apple	Apps-All School Devices	1/60	59/59 Installed	0/0 Installed
<input checked="" type="checkbox"/>	Thinking Blocks Ratios	Apple	Apps-Band 2	88/100	12/12 Installed	0/0 Installed
<input checked="" type="checkbox"/>	Thinking Blocks Multiplication	Apple	Apps-Band 2	88/100	12/12 Installed	0/0 Installed
<input type="checkbox"/>	Thinking Blocks Fractions	Apple	Apps-Band 2	88/100	12/12 Installed	0/0 Installed

← Example of the apps screen for adding and managing apps on individual and groups of devices.

In Safeguarding Students

- Web filtering – when connected to the schools internet all filtering is taken care of by your Smoothwall UTM.
- Off-site web filtering - when the student is connected to the internet at home or through a public WiFi you can still block access to certain websites. Logs can be viewed to see what has been accessed.

Example of setting up a blacklist to restrict access to websites with categories of unsuitable content for students under the age of 18.

In Managing Devices

- Know the status of all your devices at any one time for example how much battery life is left, when the device was last used.
- Install or update an application or file on a single device, group of devices or all devices.
- Content is locked down so nothing can be modified meaning no resetting is necessary.
- Customise settings for example disable the camera on devices or block purchasing.
- Set user profiles such as admin or teacher for managing the dashboard.
- Customise groups of devices within schools for classes, group work or individual work. For example into Key Stage levels, SEN sets or class sets.

↑ Example of overview dashboard summarising device information

DEVICES NEEDING ATTENTION			
NAME	OS	MODEL	REASON
RMS-Band1-12	iOS 10.3.2	iPod	Low battery (7%) iOS 10.3.2 available
RMS-Band1-5	iOS 10.3.2	iPod	Low battery (7%) iOS 11.0.3 available
RMS-BoxSet-1	iOS 9.3.5	iPod	Low battery (7%)
RMS-Band2-2	iOS 10.3.2	iPod	Low battery (5%) iOS 11 available
RMS-FS-4	iOS 10.3.3	iPod	Low battery (7%) iOS 11 available
RMS-SEN-1	iOS 9.3.5	iPod	Low battery (7%)
RMS-BoxSet-8	iOS 9.3.5	iPod	Last seen 5 days ago
RMS-BoxSet-11	iOS 9.3.5	iPod	Last seen 6 days ago
RMS-BoxSet-2	iOS 9.3.5	iPod	Last seen 6 days ago
RMS-BoxSet-3	iOS 9.3.5	iPod	Last seen 6 days ago

↑ Each device can be customised down to blocking the pre-installed settings, so for example the camera can be turned off across all devices or other inbuilt apps which you do not want to use.

← Screen showing device status. Useful for knowing which devices have been off line for a period of time or which devices are low on battery and need charging.

↓ Example of setting a perimeter around the school. Any device moving outside the perimeter will trigger an alarm. This feature relies on the device connecting to the internet externally to be able to report back.

In Location Tracking

- Know where your devices are located at any one time.
- Set a perimeter and notify if the mobile device leaves the premises.
- Notify when the device returns to the premises.

Developed by Mobile Guardian the mobile device management solutions offers you control of all mobile devices through a web based dashboard that can be accessed at any time, from anywhere when needed. The dashboard lets you manage apps, deploy content, monitor device health, locate devices and manage access to certain website to help safeguard students.

The freedom mobile devices offer students has been embraced by modern schools. Students move seamlessly from classroom to classroom, continue learning off site and use their devices at home or on holiday. Schools ICT's Mobile Device Management solution has been chosen to create and monitor a safe and secure digital environment for students during their digital learning journey.

How can Schools ICT help you?

Schools ICT will install Mobile Guardian on all devices and set the permission levels for different users.

Training is given to enable you to confidently use the full range of features.

Our simple teacher guide is a quick reference tool which leads you through the process of purchasing, installing and deleting apps.

For Software and Infrastructure SLA customers the Schools ICT help desk support is included for Mobile Guardian. They can help with settings, updates and trouble shooting. The benefit of making a request through the Help Desk is that the support can be completed immediately without the schools waiting for an onsite visit so saving time and improving the level of support.

Schools technicians can also access the dashboard and deal with any other requests as part of their scheduled visits.

How much does it cost?

The cost is based on an annual licence fee and one-off installation charge.

A licence costs £6 per device. A 3-year discounted license is also available.

Installation and configuration of the dashboard is a one-off charge of £144.

Connection and setting up of the first batch of devices is dependent on the number of devices.

Schools ICT will be happy to provide an estimate of cost for installation, just call our help desk on 01609 53 6086 and choose Option 2 – the Development Team.

Software & Infrastructure SLA customers access unlimited Help Desk support which includes Mobile Guardian support.
